Updates as of
April 5, 2024

REVISION 2

By **Peter V. Radatti**

Copyright © April 5, 2024 by Peter V. Radatti. All rights reserved.

How to Tell if you Need This

There is a part of many books called the number line. It is usually on the copyright page. At one time all publishers used number lines to indicate the book publication run. This is back in the days of large print runs before on demand printing existed. Other publishers used this line for different purposes. I use it to indicate the revision number of an *Edition* of a book. The first version of an edition is the first revision. The first revision of the same edition is the second version. If your number line has a number 1, you need this update.

Number Line Examples

10, 9, 8, 7, 6, 5, 4, 3, 2, 1

This indicates there are no revisions of this edition.

10,9, 8, 7, 6, 5, 4, 3, 2

This indicates that there is one revision called the second revision of this edition.

What are the updates?

Most of the updates are simple typographical corrections like a [to a 1. Page 411 by Tim Pitts is an addition. There are a total of 111 pages updated most with only one item updated on the page.

Build a Low-Cost Base-10 Radionics Machine

Radionic rates, devices and information is compiled for historical or experimental agricultural use.

Refer all medical problems to a licensed medical professional.

combines eloptic energy⁴ and electronic/electrical energy. I believe these are the most powerful machines. If you are trained in electronic design, you will insist that the design of the PCR-1 is defective. That is because the eloptic circuits obey a different set of rules than electronic. Often radionics circuits (eloptic energy), electronics circuits and sometimes symbolic circuits are incorporated into a design. This may not make much sense from an electronic point of view, but it is perfect from a Radionics point of view. In addition, eloptic circuits like to be physically close/small while for most electronic circuits it doesn't matter. Dowse out some of these things when designing. Don't worry if the circuit looks strange, just build it, experience it then make modifications as you see fit. If it works, it works!

One interesting issue in designing radionics equipment is that electricity moves inside of wires while eloptic energy exists on the surface of wires. It also fills the radio frequency envelope of a transmitted field and is carried by light, including laser light. Eloptic energy exists on nonconductive strings like silk or lines drawn in ink or pencil. Electric energy moves from source to ground. Eloptic energy exists without movement in space or time. Eloptic energy is everywhere on the circuit, all at once. Change the setting and there is a slight delay in the electronic circuits as the change propagates. The same setting changes affect the entire eloptic circuit at once and without propagation. In fact, the eloptic circuit may change as soon as you decide to do so even before you change the settings. Of course, these two types of circuits will look different, obey different rules, often share the same components, and work together. That can be very confusing. Don't let it confuse you, just experience it!

Last note on design, if you truly want an explanation within physics for why radionics works, it is my opinion that it operates within the **Information Interpretation of Quantum Mechanics**.

If you decide to modify the design, dowse your changes to insure they are stronger than the existing circuit. The potentiometers section of this design is eloptic. It makes no sense at all from an

⁴ T. Galen Hieronymus called whatever the radionics operating effect is, eloptic energy. It's as good a name as any other.

electronics point of view. Most of what is dealing with the amplifier is straight electronics but even there the two types of circuits, eloptic and electronic meet. The PCR-1 does not contain symbolic circuits but can. For example, a symbolic, eloptic and electronic design look at Charles' Equalizer machine. In the Equalizer, the wiring order and placement of the potentiometers is a significant symbolic eloptic design feature that provides destructive power to the machine.

Some people are going to criticize this design. That is their right. It is my right and your right to ignore them if the system is working for you, and you are happy. You may notice that this design allows for many people to make and offer accessories and modifications. Its design is clean and straight forward therefore easy to modify or enhance. Hopefully, some people will take advantage of that.

This book has been made available to test builders/readers for a few years prior to its publication to ensure that it will be well-tested and workable by the reader. Due to that fact, there are a few people who are making these devices professionally. Great! There are also people who made machines for their friends and families.

I named this machine after my friend, Charles Cosimano, and myself. I first looked at the name CPR (Charles Peter Radionics) but that sounded too much like a heart attack⁵, hence PCR (Peter Charles Radionics) and since it is the first in this series Mark-1. The PCR Mark-1. No one ever claimed I was good at naming things. ⁶

The goal of this project is to design something that anyone can build, no matter what country they live in, at very low costs. This limited me to parts that could be located or salvaged in every country of the world. This project is my contribution to bringing Radionics to people that would benefit the most from having it.

⁵ In the United States CPR means Coronary Pulmonary Resuscitation which is a procedure you perform to save someone's life when they are having a heart attack.

⁶ I thought Tarzan's name for his son was good. He named him, "Boy"!

machines based on the design in this book. You will generally find high praise. Just for the record, here is my statement on the design in this book and on variations of the design in this book. *“The base-10 design presented in this book is powerful, effective, and safe. It is based on historical designs from the greats in Radionics. Try it and you will like it.”*

Like all my books, any corrections or enhancements to this book will be made available free from my website www.radatti.com/books Consider signing up for my newsletter while you are there.

If you purchase the paperback of this book, it is also available from Kindle Unlimited and Kindle Book Loan programs. None of my books contain digital rights management, DRM.

If you are operating an organization that teaches Radionics, especially in service to people who cannot afford traditional equipment and need copies of this book please contact the author. peter@tigerteam.com It may take a few days for me to get back to you.

For those of you who use KRT or other Hieronymus style machines, the output of this machine can be input to your machine or vice versa. That gives you the ability to have both Hieronymus and Base-10 on one machine. I have found that useful. Connect the output connection of the Base-10 to the BNC connector (round, metal connector) on the Hieronymus machine. My personal Hieronymus machines are all made by KRT Radionics. They are proven by the test of time.

You may wonder why I allowed my photo of myself to be used on the cover of this book. Isn't it a witness people can use to attack me? Sort of. First, there are a lot of photos on the Internet of me. Having one more is no loss of protection. Secondly, just because good housekeeping should always be done, the image is a drawing and not a photo and has been de-energized as a witness then locked. The caricature was created by Rehman Khan of Pakistan who can be located on Fiverr.com. It is interesting in that he used the Normal Rockwell style popularized by the Saturday Evening Post. Finally, those individuals and groups (and there have been groups) that attacked me in the past, for some reason, never talk about it. I allow you to use your imagination as to why. The photo

YOUR WORLD VIEW IS IMPORTANT— OPENING YOUR MIND

This section is copied from one of my other books, but it is worth repeating. If you think you can't, then you won't be able to.

Radionics is a means of focusing and amplifying your intention to interact with the energy and spiritual aspects of existence. As such, it allows you to balance and direct energy fields and vectors that compromise existence. There are many explanations of how Radionics works, including strong hints in Quantum Mechanics. How it works is less important than the fact that it works, and you can learn and use it to improve your life. In fact, it may be the most powerful single tool you ever use.

“In each century since the beginning of the world, wonderful things have been discovered. In the last century, more amazing things were found out than in any century before. In this new century, hundreds of things still more astounding will be brought to light. At first, people refuse to believe that a strange new thing can be done; then they begin to hope it can be done; then they see it can be done – then it is done and all the world wonders why it was not done centuries ago. One of the new things people began to find out in the last century was that thoughts — just mere thoughts — are as powerful as electric batteries — as good for one as sunlight is, or as bad for one as poison.”

-Frances Hodgson Burnett, “The Secret Garden” – Autumn, 1910

The famous British author Rupert Sheldrake was once a guest at the TED conference (a non-profit devoted to Technology, Entertainment, Design concepts worth spreading. www.ted.com). His speech was recorded and appears on YouTube but was banned from display on the official TED website. Why? Because it caused people to open their minds and reject many so-called scientific facts by revealing that the game was crooked. In science, we are taught that certain facts are unchanging laws. These laws then become the foundation upon which all research is built.

THANK YOU TO MY TEST READERS!

Many of them have worked with me since 2020 when I started writing this book. In no special order.

Dr. Tony Gardner, Jessie Choudry, Sami Choudry, Dr. Tedd Koren, Dr. Kendar Ghatnekar, Maestro Dan Tuck, Dr. Sky Monarch, Mike Shaffer, Sarae' Atoi Thomas, and many others!

The caricature of Peter Radatti was created by Rehman Khan of Pakistan who can be located on Fiverr.com

LEGAL NOTICE: My thanking an individual does not indicate their endorsement of this book or radionics in general. It is my thanks for their work in attempting to make this book more readable by being a reviewer.

For those that care, I also have titles. I just don't find a reason to use them.

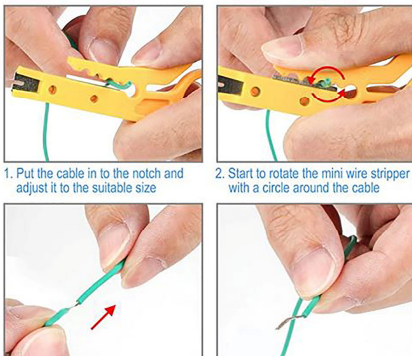

WIRE KIT - STRANDED WIRE, TINNED COPPER HOOKUP WIRE KIT 22 GAUGE, PVC INSULATED

Quantity Needed: different colors about 10 foot each Cost: \$0.72 (72 cents)

- 6 Rolls 22 AWG electrical wire, 30 feet per roll; available in 6 colors: black, red, yellow, blue, white, green in one box with holes for easy pull out the wire.
- UL Approved, PVC Insulation, Voltage Rating: 300 Volts, Rated Temperature: 80 °C, Maximum Operating Current: 1.5A
- [TINNED COPPER WIRE] Tinned copper inner core can maintain copper wire for a long time does not oxidize. Protect them from corrosion and make it easier to solder and extend the service life of the hookup wire.
- [HIGHLY FLEXIBLE] Due to the fine stranded core, made of multiple strands of wire. The stranded wire is very flexible to strip and solders. Super low impedance for a highly efficient connection
- [WIDELY APPLICATION] Our hook up stranded wire kit is suitable for various internal wiring of appliances and electronics.

Salvage Notes: This is a very thin plastic-coated wire that is very easy to find. You can use any wire and the colors are not necessary. Colors make it easier to see what you are doing but that is the only value. The only thing necessary is that the wire is thin and most of it is braided, not solid. Doorbell wire is thicker than needed but will work. Thick solid wire is hard to work with.

THERE ARE THREE (OR MORE) VERSIONS OF THE WIRING

It exists for people who are interested in these types of things. If you find this page difficult, please just ignore it and continue with the rest of the book. It is not necessary to understand this page. It is provided for people who ask why. Read the A, B and C sections before building.

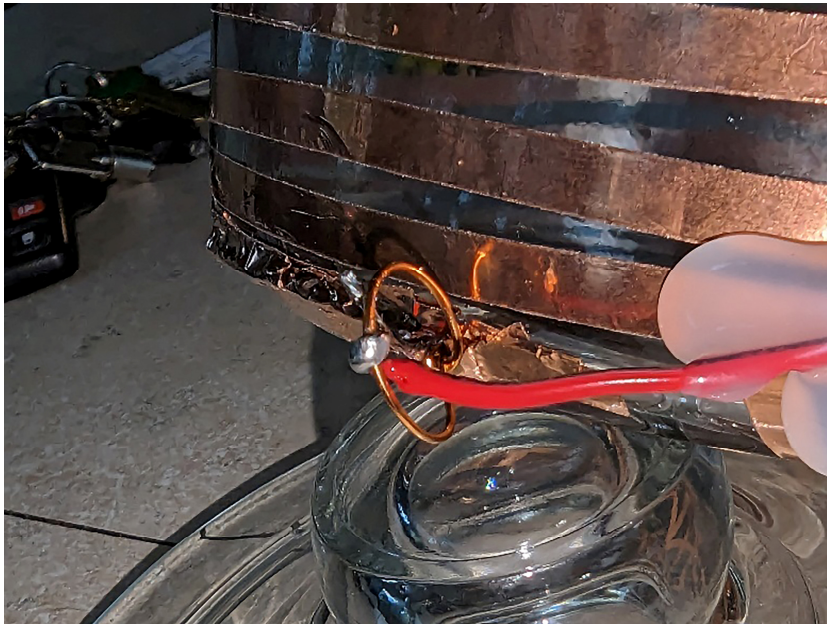

Version A has Pin 3 on Pot 1 connecting to Pin 2 on Pot 12 via crystal and Pin 1 on Pot 1 connected to Pin 1, Pot 2 AND Pin 1 on Pot 12. Pot 6 is used to connect to the rest of the device.

COOKIE JAR WELLS

A “cookie jar well” is made from a glass cookie jar. They are large with a large opening and a nice lid with a bell handle. Using inexpensive copper tape which has conductive adhesive on one side I start near the top of the jar and run the tape around the jar in a spiral until I reach near the bottom. At the top I start just below the bend in the glass and at the bottom I end at just above the bend in the glass. If the tape breaks that is ok since the adhesive is conductive you can just restart the tape over the copper about an inch before the break. Continue until done. Next you want to make easy-to-use contacts. I use a piece of copper wire. I circle the wire around a test tube or magic marker then twist the wire until there is about an inch (about 2.5cm) of twisted wire under the loop. Remove the loop from the tube and twist it at ninety degrees. Place the twisted part of the wire on top of the copper tape so the loop is at the end or beginning of the tape. Cover the twisted part of the wire with 3 or 4 pieces of copper tape that overlaps it and extends past about a half inch. Run the tape through the loop and secure on both sides.

Make sure the wire is securely attached to the copper tape and the tape does not overlap nearby spiral tape. Repeat for the other end.

I run copper tape across the bottom making crisscrosses until a good bit is covered. Each end of the tape ends on the last piece of tape wound around the bottom of the jar.

Build a Low-Cost Base-10 Radionics Machine

Radionic rates, devices and information is compiled for historical or experimental agricultural use.

Refer all medical problems to a licensed medical professional.

clockwise, counterclockwise, infinity symbol (sideways 8), up-down, side-to-side, corner to corner or just plain random. The pattern you use should be comfortable for you and has no significance.

There are a lot of opinions on how many fingers you should use and how you should move them for optimal Stick. I can tell you that less than 2 and more than 3 doesn't work for most people. However, you might be the exception. Start with 3 and drop down to 2 if you wish. Here is the truth, use whatever makes you comfortable. It is more important that you can do stick or any form of dowsing than it is that you use any specific pattern or number of fingers.

There are two states in Stick—unfettered movement of the fingers and Stick. Stick, in simple terms, is when the unfettered movement of the fingers stops because they “stick” to whatever surface you are moving them over. So, movement and a stop of movement is how you define Stick.

The only requirement of Stick is that the movement is continuous and smooth. Do not speed up or slow down. Do not stop to watch butterflies. On the other hand, this does not require intense concentration. Stick can only answer a few types of questions. Yes, No and Numbers. For example, **NO STICK IS NO. STICK IS YES.** You can also slowly count numbers and the number you get stick on is the answer. Example: Start moving your hand and count 1, 2, 3, 4, 5, 6 – you got stick on the number 6 so the answer is 6.

When using stick to determine a setting on a dial (usually a number) start slowly turning the dial starting at zero and stop when you get stick. That is still a yes/no answer. “YES, that is the number”, stop turning the dial and look at the number.

After a good bit of experience, you will find there is another form of Stick which is a mental “feeling”. You will know when you are about to get Stick right before it happens. This feeling comes with experience and is not something you generally need.

This bears repeating: A lot of people teach that you should only use the Stick method when doing radionics. No! Use whatever makes it easy for you. Most people who cannot “get” stick use the pendulum comfortably.

LAB EXERCISE 1 - LEARNING STICK

In this lab, you will gain experience practicing Stick on either a Stick pad (a piece of Radionics equipment designed for Stick) or any slick surface, such as packing tape, plastic, paper, metal or the back of a cell phone. The goal of this exercise is for you to experience Stick with a simple yes or no answer. Using the Stick pad as your work surface, move your fingers at a constant speed over its surface. Don't press down but let your fingers glide over the surface. Use a speed that is comfortable for you—neither too slow nor too fast. If your fingers “stick” right away, then use a tiny amount of arrow-root power to dry your fingers. Overuse of arrow-root powder will make your fingers so slick that it will be very hard to obtain Stick. I find that if you give the arrowroot bottle a shake, then touch one finger to the inside of the bottle lid, which is usually the correct amount to use. Just spread the arrowroot over your entire hand.

Once you have done this for a little while, I want you to fix the following intention into your mind. If a statement is true, then I want Stick within 2 or 3 seconds. Next ask yourself the following question, “Is my name <yourname>“, where *yourname* is your *actual* name and not a pseudonym. You do not have to say this out loud. If you experienced Stick, try out a few other questions, including questions where the answer is no. Once you feel you have this skill down, you can move to Lab Exercise 2.

If you cannot obtain Stick, try different things to get comfortable. Take off your shoes. Face a different direction. Some people are sensitive to the direction they are facing when they are first learning Stick. Try facing different directions or just move to a different part of the room. Put on a sweater if it is cool. If none of these actions work, take a few minutes to relax and clear your mind. Ask the instructor, or any other student who already has the skill, to help you. The way they can help is by putting their hand on you with the intention that the skill they have in obtaining Stick is copied to you. If none of this works, then get up, leave the room, get a drink of water, and walk around a bit. After several minutes, go back to the training room and try again. Make sure you let the instructor know you are having a problem so (s)he can help! These problems will not remain once you have enough practice.

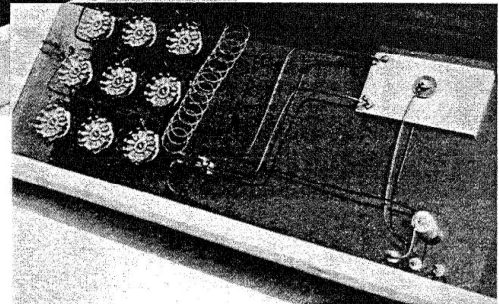

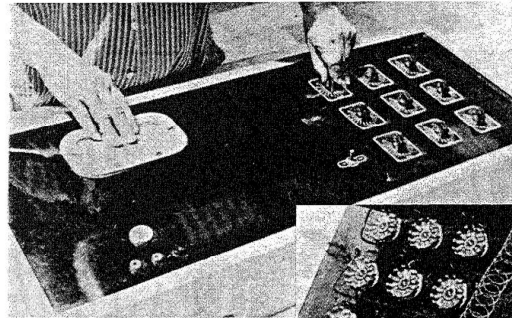

Build a Low-Cost Base-10 Radionics Machine

Radionic rates, devices and information is compiled for historical or experimental agricultural use.

Refer all medical problems to a licensed medical professional.

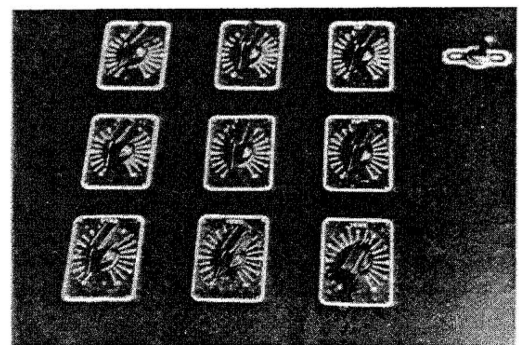

“A small bar or horseshoe magnet moved slowly around among the dials and over the footplates should suffice. The rubbing or detector plate should be cleansed with a strong astringent, such as oil of cloves Dr Drown used a different tin plate for each patient when giving a series of XXXXXments.”

THE HOMO-VIBEA RAY INSTRUMENT of Dr. Drown's early days, designed for right-handed people. The operator's right hand is on the rubbing or detector plate, where the shtick is produced when the circuit is shorted at the finger-tip contact.

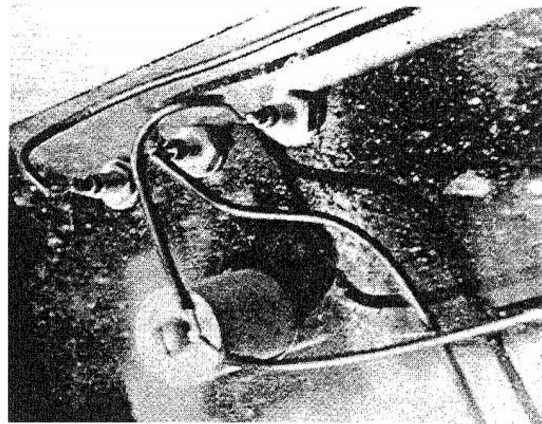

THE OPERATOR'S left hand is on Dial 9, the tuning, dial, the pointer of this is set at 10 and brought down the scale until the shtick indicates the number or rate of the disease. The other dials have been set with the rate given in the Atlas. Above the rubbing plate is the Specimen Well and three contact points for wire leads from the German Silver footplates, for the Ground Wire, and for the Tin XXXXXment plate when the machine is used for XXXXXment. The XXXXXment plate wire connects to the specimen well.

THE SECOND PICTURE ABOVE shows the underside of the black Bakelite Control Panel, with the nine rotary switches, the dp/dt circuit switch, and the metal underplate for the rubbing plate. This appears to be aluminum. The rubbing plate itself can be ebony or Brazilian Rosewood (though on this machine the rubbing surface appears to have been a replaceable plastic fiber of some kind. The specimen well appears to be of cast aluminum THE THIRD

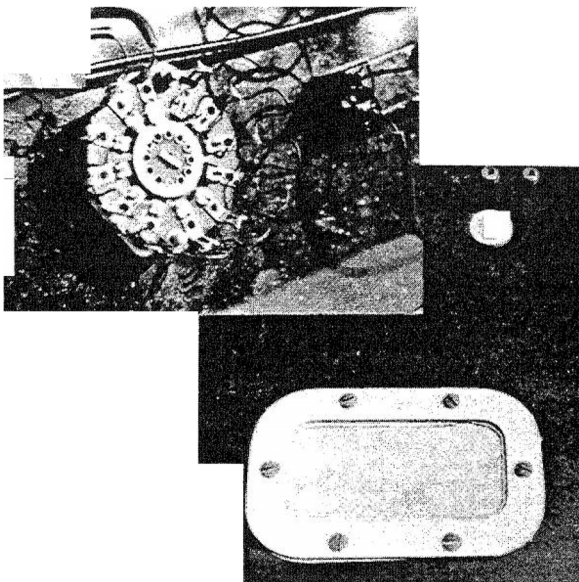

PICTURE, at left, shows the nine dials of the Drown system which are based on the Sephiroth of the Tree of Life of the Western Mystery Tradition of significance only to those interested in occult science. Though the dials are numbered from 0 to 10 (eleven positions) there are actually 12 positions or contacts on each rotary switch. The radiant energies of the 12 Constellations of the Zodiac are coming in from all directions of the Compass; so, this relates the dials of the Drown instrument to those cosmic forces which hold the earth and all its inhabitants in a grip of iron.

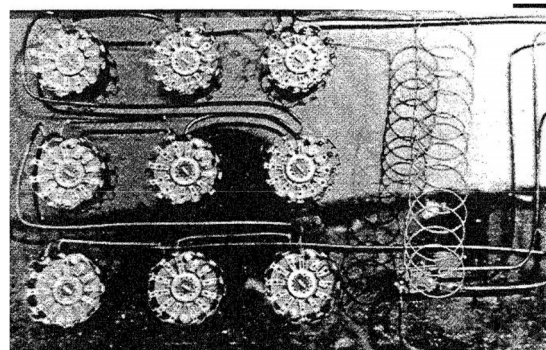

Actual experience showed the full circle or 360° rotary switch, and the wire wound potentiometer, gave the best results and finest tuning in both diagnostic and XXXXXment work. The dials or rotary switches of the original Drown circuit had a value of 10 ohms each, from dial 1 through 9, giving a total resistance value of 90 ohms. As you can see in the picture of one rotary switch above resistance wire was carefully looped between each contact point to give one ohm resistance between each point. More resistance

in the circuit was made by the 12 loops of No 19 bare

wire
you
see
here,
with
the

loops soldered to each other where they overlap. But this circuit wasn't capable of the fine timing most operators desired; so, the original Drown circuit was modified as you see in the large schematic on the preceding page, with 100 ohms total resistance in the No 1 dial, instead of only 10.

This eliminates the need for the resistance of the 12 loops of #19 bare wire in the original circuit.

INSTRUCTIONS FOR XXXXXXING WITH DROWN HVR INSTRUMENT, USING ELEMENT ATOM RATES.

AUTHOR NOTES: I don't think anyone uses this method in the United States. I have no idea if it is still in use in Europe where Base-10 machines are more common. What I can say is that I just can't see any reason for the complication of atomic rates and some of this doesn't make sense to me, but it was written in the 1930's and it's now 2022. A lot of understanding in science has changed since then. One of my favorite sayings is that What Work, Works. Since there is ample documentation that Dr. Drown's methods worked, who am I to criticize?

Note: The basic atomic rate is 10-1 (ten one). The last number or numbers on the rate are the same as the atomic number of the element on the periodic chart.

In checking imbalance of the element atom, we place on the Instrument the rates 10-1-7-5-9-2-2-8, for SENSORY nerves, and register on the last dial the different nerves that give us a reaction.

For SYMPATHETIC nerves we place on the instrument the rates 10-1-7-3-9-2-2-8, and register on the last dial the nerves that give the reaction.

The same with the MOTOR nerves - we use rate 10-1-8-6-5-2-2-8, and register on the last dial the nerves that give the reaction.

In this way we find the cranial nerves that are out of balance; then check back on the chart. For Instance, take the FIRST CRANIAL NERVE. If it registers impingement under 8-6-5-2-2-0-8, the Hydrogen and Cesium would be out of balance, their atom numbers being 10-1-0-0-0-0-0-1-1 for Hydrogen and 10-1-10-5-5 for Cesium, one being a descending branch of the nerve and the other an ascending branch.

In order to normalize the atom in the body, we would use the atomic rate of these elements and when this is held a certain length of time the unbalanced number of electrons is balanced, and the atom brought back to normal.

Radionic rates, devices and information is compiled for historical or experimental agricultural use.

ACTIVITY CTRS.

The following Ctrs. are all located in the Base of the Brain, except the Mucosal Activity Ctrs., which are located in the supraorbital region. These Ctrs. Seem to be diseased before the organ or system is affected, and are generally in a worse condition, than the work of the organ or system would indicate. For a XXXX these Activity Ctrs. must be brought back to normal. The rate for the Activity Ctr., that is to be tested, is put up on the first reflexophone. The S. V. area is to the left of the umbilicus, and the percentage is measured on the tenths and hundredth*.

Bone Activity Ctrs., Rt. 134; Lft. 144.

Joint Activity Ctr., 633, Rt. and Lft. side.

Muscle Tendon Activity Ctr., 367.

Integument Activity Ctr., 646, Rt. and Lft. side.

designated by 906344, with 0 on the sixth, seventh and eighth dials, measuring on the ninth dial, beginning with 8, the eighth cervical nerve, registering down to the first cervical nerve. The dorsal region is designated by rate 2 — thus the dial board will read 90632, with 0 on the fifth, sixth and seventh dials, leaving the eighth and ninth dials to designate the number of the nerve impinged, e.g., 1 on the eighth dial and 2 on the ninth dial, designates the twelfth dorsal, and 1 on the eighth dial and 1 on the ninth, designates the eleventh dorsal. Then turn the eighth dial to 0 and register on the ninth dial from the tenth dorsal to the first dorsal.

The rate 21 is given to the entire lumbo-sacral-coccygeal area, because of the fact that the spinal cord ceases to grow much past the second lumbar. Thus, for the first coccyx, or ano-coccygeal nerve, the dial board will read 90632100 with 1 on the eighth dial and 1 on the ninth dial. Then turn the eighth dial off and the ninth dial to 10, and this is read as the fifth sacral. 9 as the fourth sacral, 8 as the third sacral, 7 as the second sacral, 6 as the first sacral. This brings 5 into its normal position as the fifth lumbar, and 4, 3, 2 and 1 as corresponding lumbar.

The function of any part of the body not otherwise designated on our chart is regarded as registering 10/10 normal function. For instance, take the right coronary artery of the heart — while the heart muscle itself is designated as 4/10 normal function, the arteries (also the veins) throughout the body have a function of 10/10. If the right or left coronary artery registers low in function, the patient's condition is apparent. This is true for any part of the body.

Where there is a right and left organ and, but one rate is given in the Atlas it is considered as the rate for the* right organ, and the addition of 1 will give the rate for the left organ. Where there are exceptions to this rule, the rates for both the right and left organs are given in the Atlas.

FOR LOCALIZATION OR MEANS OF A CHECK-UP

To confirm the findings on the patient: place the disease rate on the instrument and pass the metal part of the XXXXXment cord over the area of the patient's body where the disease has been localized through the instrument. When that particular area is touched, a reaction will be received

Radionic rates, devices and information is compiled for historical or experimental agricultural use.

URINE ANALYSIS

Last 3 dials on 10 then down (odd figures)

Specific Gravity (60)98710

Reaction, Acid 609353

Reaction, Alkaline 609356

Urea 609567

Solids (To find amount of solids, multiply the amount of urine voided—in ounces in 24 hours by the last two figures of the Specific Gravity; add to this product 1/10 of itself and the result will be in grains).

XXXXXX Uremia 506, 37, 371 + sweet spirits of nitre (506 = Uric Acid) (37, 371 = Kidneys) Urine
609

Bile Pigment 60942

Sugar 60957

Albumen 60977

Indican 60953

Acetone 60969

Diacetic Acid 60997

Tube Casts 60923

Epithelial Cells 609101

Pus Corpuscles 60960

Red Blood Corpuscles 60949226

Leukocytes (White Blood Corpuscles) 609371

Spermatozoa 609784

Mucus Threads 609972

Bacteria 6091280

Uric Acid Crystals 609562

and since the body is made up of polarized atoms, it comes under the head of electro-magnetic energy, magnetically speaking. Like poles repel and unlike poles attract, and bacteria is the same polarity as the body in health and is thrown off where the body is brought up to its normal polarity. When feeling is sent from any person it unerringly returns.

NOTES AND RATES

If you cut your finger, you do not heal it neither does the doctor. The healing comes from within, from that radiant Life Force, which is the only force that has the power to rebuild cells. That is the only energy we use in making a diagnosis, in taking pictures, in XXXXXment, sending the patient's Life Force to the parts which need rebuilding.

Check spleen for trembling of hands and hyperthyroidism.

Uric acid and calcium out of balance in cataracts which come from thyroid and parathyroid; check small intestines for 506 and 20.

Use 901-2-6 for adenitis, for children who have adenoids; also check and XXXXX thymus and thyroid.

Spider bite rate in Atlas is for black widow. Place bottle of household ammonia on foot pads*

For Parkinson's disease XXXXX suprarenals.

Flatulence (gas) at any time regardless of what or when anyone eats, comes from the kidneys.

Contraction of portal veins causes hemorrhoids. Also check head of pancreas*

When H.C.L. is too low, suggest one-half teaspoon of lemon in water before meals to start it flowing.

We never XXXXX areas where X-ray or radium has been used, as the nucleus of the cell has been killed.

We never XXXXX chronic alcoholics or drug addicts. It is not they who wish to be XXXXd, but their families wish, and the sensitive Life Force will not penetrate drugs, aloe or alcohol.

When there is low uria, check liver.

Unidentified bacteria in urine gives an inner nervousness.

Use aloe in well of instrument if patient has any drug (aspirin, sleeping medicine, glandular extracts, etc.) in system, so as to procure correct reading.

Check spleen when polys are low and sympathetics are high.

Sugar and acetone in urine goes back to liver. It is indication of hepatic diabetes.

Hyperthyroid often causes sugar to be thrown off in urine.

Add 9 to uterus rate (9-5-4- (-9 for testing uterus after menopause.

Trouble in knees comes from ovaries. XXXXX ovaries.

0-8-3-2-1 for nausea.

Do not XXXXX worms. It makes them grow.

USING BAR MAGNET FOR POLARITY

To test polarity of remedy use bar magnet; all dials at 0; disconnect patient, place remedy in well, and with XXXXXment cord test whether it is positive or negative. To test polarity of patient, patient has feet on foot pads, all dials at 0, test with bar magnet whether positive or negative.

When pathology registers in lymph (3-2-7), test cysterni chyli for trouble (3-2-7-8).

Always clear abscess or strep, out of T.B. areas before XXXXXing for T.B.

Use 0-5-9-6-9-7-9-8-9 (parathyroids) for hemorrhage anywhere in body.

Use 50-7-9-10 (auto intoxication rate) for heavy feeling.

Pain extending from front to back of abdomen. Check gall bladder for trouble.

When erythrocytes are low, check for anemia.

RETENTION OF URINE

1 quart of boiling water poured over 4 sliced lemons, 1 teaspoon of cream of tartar, 2 teaspoons of Epsom salts, honey to taste, and drink.

COLDS

Flu 308-2-3-9-1-7-7 (L. bronchial and L. lung)

308-2-3-9-2-7-6 (R. bronchial and R. Lung)

308-2-5-4-3-6 (antrum and sinus)

308-2-2-2-7-2-3 (Entire intestine and both kidneys)

fracture in the semi-circular canal 707 -2-8-5-5. Check for aneurysm in arteries and veins of head. 405-2 (aneurysm in 409-4 (veins, in 2-9 or 2-9-1, or 9-9 or 4-4. Also, 405-2 (4-9-7) in 2-9 or 2-9-1 or 9-9 or 4-4.

Check for aneurysm when there is heavy throbbing anywhere in body.

When veins or arteries are low in function, check for arterial sclerosis 903, contraction 207, dilation 306-5, thrombosis 909-8, or hydrated cyst 302-9-1 in veins or arteries.

When throat is NOT sore yet there are painful and swollen glands check for congested lymphatics.

Gums which are blue, check for lead poisoning, also for lead poisoning in other parts of the body.

QUESTIONS AND ANSWERS

Q: When one finds, e.g., Thyroid, as an originating cause, and 302, 60, and 402 there, how does one decide on which of these rates to begin XXXXXment?

A: Always use the most acute condition, 302, first, then the next, which would be 60, and then the 402.

Q: Mentioned in the book, a case in which trichinae were XXXXXed on Homo-Vibra Ray. How was this done?

A: By XXXXXing the tissue structure with the instrument and the trichinae with homeopathic medicine.

Q: How does one distinguishes sarcoma from 508 obstruction, etc., similarly with 501?

A: 508 is sarcoma but obstruction rate is different unless the 508 is the obstruction, then measure on the last dial the amount in order to designate the amount in area.

Q: If you have a case of caries of the bone, and have got rid of the active trouble, can anything be done to help new bone formation?

A: The XXXXXment of caries rate directs the Life Force which is always pure into the part and holds it focus-sed there and produces rebuilding into the part.

Q: Patient with open scirrhous of breast, no shtick now for 50, but marked on 70194, should one XXXXX on the latter rate, or XXXXX for ulcer only?

Dr. Drown found something that worked, this is not the only passage discussing it, but whatever it was it is not what we today call the Luschkas. If indicated, use the rates and ignore the description and see what happens. Check for harm to no one first!

THE FOURTH STATE OF MATTER, PLASMA

First, energy (Plasma) is brought down into a gas. Gas comes into body and becomes a liquid, goes then through a gelatinous stage, then through a calcification or crystallization stage. After death, from calcification or crystallization to gelatinous stage, then into gas stage (which one smells) and back to etheric stage from which it came.

The red cells, white cells, blood platelets, salts in the blood, etc. (all of these things are taken into consideration in blood transfusion, but it is the energy which activates all this in the plasma that we are speaking of) belong to the body and return to the earth with the body. While the energy which activates this return to the ether from which it came. "It" being a form of Light made of electrons which are now being used in the electronic force field which acts the same as a lens, either in a microscope or in television, and is now being used for scanning in television in England. We have been using it since 1935 when we made our photographic instrument.

RATES TO MEMORIZE

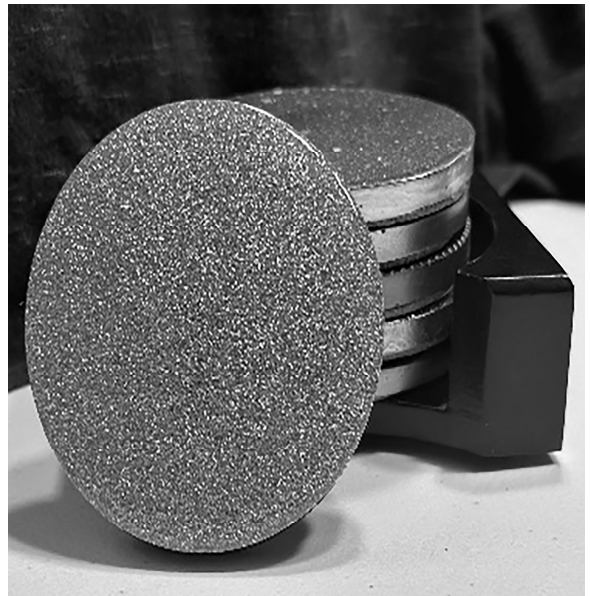

0-1-6-3	Minerals
0-5	Acidosis
10-4-2-7	Hemorrhage
10-4-8	Hernia
10-9-3-7	Malformed
10-9-1	Cirrhosis
10-9-2	Trauma
10-9-5-4	Menopause
10-1	Adhesions
10-2	Pin worms

immune to attacks which involve direct touch. For that look at bubbles of protection which can be combined with this program. ROSP (card# 1) contains a bubble of protection.

If you want to send radionics programs at the same time as the cloaking program, then put the cloaking program in the input well along with the witness and any other programs or setting you want to transmit. They will be sent together. Therefor the machine that transmits the cloaking program can in fact see you. That machine should be physically secured from mischief. To discontinue the cloaking program just remove it from the well.

Not tested but should work, is to potentize the cloaking program into jewelry. If you are wearing the jewelry “they” should not be able to target you. To discontinue the cloaking program just remove the jewelry.

As an aside, the word cloaking means to hide or cover, to not be seen. Warning if you attempt to attack a senior radionics master while cloaking yourself, I suggest you think two or three times first. Your attack is the witness needed to find you.

46. Lazarus Program Version 2

The Lazarus program does not raise the dead, but it takes people on death’s door and gives them more time. The primary reason for this is to give the Doctors more time to do what is needed to return to health. Can add years but each case is different. Requires 24/7 broadcast.

48. Herbal Turpentine from American Georgian trees

No explanation is offered for this program. Either you know or you don’t.

72. Exorcism Version 2

This program was developed as a joint effort with Rae Bright Star Thomas. This version will attempt to get rid of demons and evil spirits up to a middle weight fighter. Later versions will take on heavier fighters. There are still problems with people who actively defend the demon who is infesting them. Includes Exorcism Version 1. **For more information on Rae Bright Star Thomas see her store front. Custom orgone and potentized items.** <https://www.etsy.com/shop/WholisticArtisan>

There is a second book titled, “How to Build an Electronic Witness Well for Radionics” by Peter V. Radatti. ISBN-13: 978-1545124819, ISBN-10: 1545124817. The paperback imprint is available from www.amazon.com. Kindle and kindle unlimited.

There is a third book titled, “Level-2 Radionics” by Peter V. Radatti. ISBN-13: 979-8683507800 About 464 pages, it is available from amazon.com. Paperback, kindle, kindle unlimited.

I also write books on nutrition and computer security. You can see a list of my books and any supplemental material available at www.radatti.com/books

General Comments from Pete:

Some people have asked why there are numbers missing. The reason is because I did not release those programs. There could be a lot of reasons for that, including some of these programs are fragments used as a subroutine in larger programs. A few programs I am not releasing because they could be dangerous and should not be used by inexperienced operators. A few are not released because it is not time for them. Everything I release is safe for a beginner or advanced user.

I have been asked how I make money if I don't charge for programs. I provide a very Zen like answer; this is what I want. Of course, I have a job where I make my living and I have used radionics to be very good at my job, which has rewarded me financially.

How can I find more radionics operators? Facebook and meetup.com are some of the best places to network with radionics operators on a global scale. Facebook may become problematic for radionics operators and some people are already planning to move to mewe.com if Facebook censors radionics. Many existing Facebook radionics sites have moved to private or secret. There are not a lot of meetups so create your own “club” and hold meetings.

I want to send you a thank you, what do you want? My favorite gift is an email telling me what you have been up to. Feeling appreciated is always good. You could use the email address peter@tigerteam.com If you liked my books, please leave a review on amazon.com.
